Professional resume/About:

I am a professional Front End Developer, with 2 years of professional experience, in search for job opportunities for Front End Developer and Full Stack Developer. I consider myself an effective, flexible and highly motivated communicator, capable of achieving well- founded goals by applying my skills to contribute to innovative and efficient solutions. I aim to create quality products, simple to use, scalable domains and always focusing on the user experience, using technologies such as React, Node, AWS, JavaScript, TypeScript, HTML, CSS and Git

Academic Education:

Information Security Technologist - FATEC Ourinhos.

Network security, Cryptography, Risk management, Digital forensics, Application security

Object Oriented Programming (Java, Python), Database (Docker and MySQL), Linux and Debian

Skills to protect systems, data and networks against cyber threats by applying security practices

Risk management and regulatory compliance

Internet Computing Technician - ETEC Ourinhos

Programming Languages (C++, Java, Python, PHP)

Object Oriented Programming (Java, PHP)

Web languages (HTML5, CSS3, Javascript)

Database (MySQL)

Hardware and Network Fundamentals

Languages:

Brazilian Portuguese - Native

English - Advanced level C1

Spanish - Basic

Knowledges:

Methodologies: Scrum and Kanban

Front End: React, React Native, Redux, JavaScript, TypeScript, HTML5, CSS3 (Styled Components, SASS, Tailwind, Bootstrap), Figma, Storybook

Back End: NodeJS, NextJS, Creation and integration of REST APIs

Tests: Vitest, Jest

Database: MySQL, PostgreSQL, SQL Server, GraphQL

Concepts: UI/UX, Mobile First, Clean Code, CI/CD, SOLID

Laws and standards: LGPD, ISO 27001, ISO 27002

Cloud Platform: Amazon Web Services (AWS)

Operating systems: Windows, Linux

Containers: Docker

Office Applications: Microsoft Word, Microsoft Excel, Microsoft PowerPoint, LibreOffice

Professional Experience:

Compass UOL - Front End Developer (November/2022 - September/2023).

Contributed significantly to the project in production, Livelo App, working on the development of software components

I worked a crucial role in creating and implementing test components

Actively participated in integrated testing of developed components and systems

Worked in a vital role in meetings using agile methodologies

Improved the Livelo App Design System for web and mobile platforms, thus ensuring the quality and efficiency of the project

Freelancer - Front End Developer (Setembro/2023 - Até o momento).

I worked independently with end-to-end software development, from gathering requirements with the parties involved in the project

Produced prototyping, coding on the client and server side, testing, documentation, implementation, until presentation to the end customer and user

Implemented applications in real-time production using strong languages on the market, always up to date and at international standards, working with agile methodologies

Certificates:

EF SET English - Advanced English C1 (2022)

Amazon Web Services - AWS Cloud Architect (2023)

Amazon Web Services - AWS Cloud Foundations (2023)

Amazon Web Services - AWS Partner: Accreditation (Technical) (2023)

Amazon Web Services - AWS Partner: Cloud Practitioner Essentials (2023)

Amazon Web Services - AWS Partner: Cloud Economics Accreditation (2023)
